The uniqueness of our growing location in terms of climate and water quality coupled with proven European growing techniques allows us to produce plants that are of incomparable quality and well prepared to thrive in their new location.

Our product range is grown to set specifications, which allows control of quality and a supply of consistent plant stock to the market.

Plant Biz currently holds 40,000 inground plant specimens in our 30 acre Peats Ridge property just 30 minutes from Hornsby.

We also offer a contract growing service to facilitate your longer term scheduled projects.

Please enquire about our super advanced ex-ground stock and find out more about our specialist contract growing service.

Company Profile

For over 20 years Plant Biz has been supplying their unique plant range for residential landscapes across Australia.

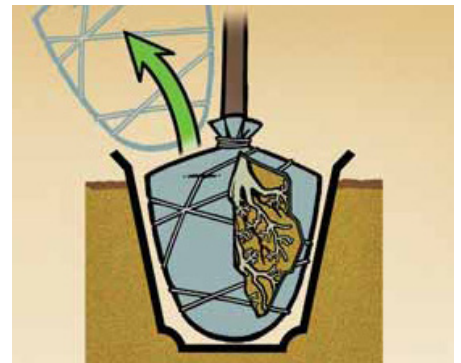

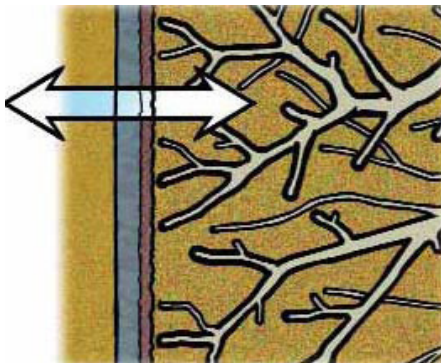

Specialising in the production of advanced plants our product range can be broadly defined by: Hedging/Screening, Topiary and Specimen. A rigorous selection process has defined our species list based on strength of resilience, character and performance.

Production Method

ARMS ® technology

This technology involves coating a non-woven membrane with SpinOut resin (containing copper hydroxide). On contact with this surface, root ends naturally go into a dormant state. This phenomenon promotes the development of secondary roots, which improves the entire root system while preventing root circling and emergence.

ARMS benefits inground

- Perfect development of structural roots
- Consistency in plant growth
- A stabilised supply of water and nutrients

ARMS benefits once removed from ground

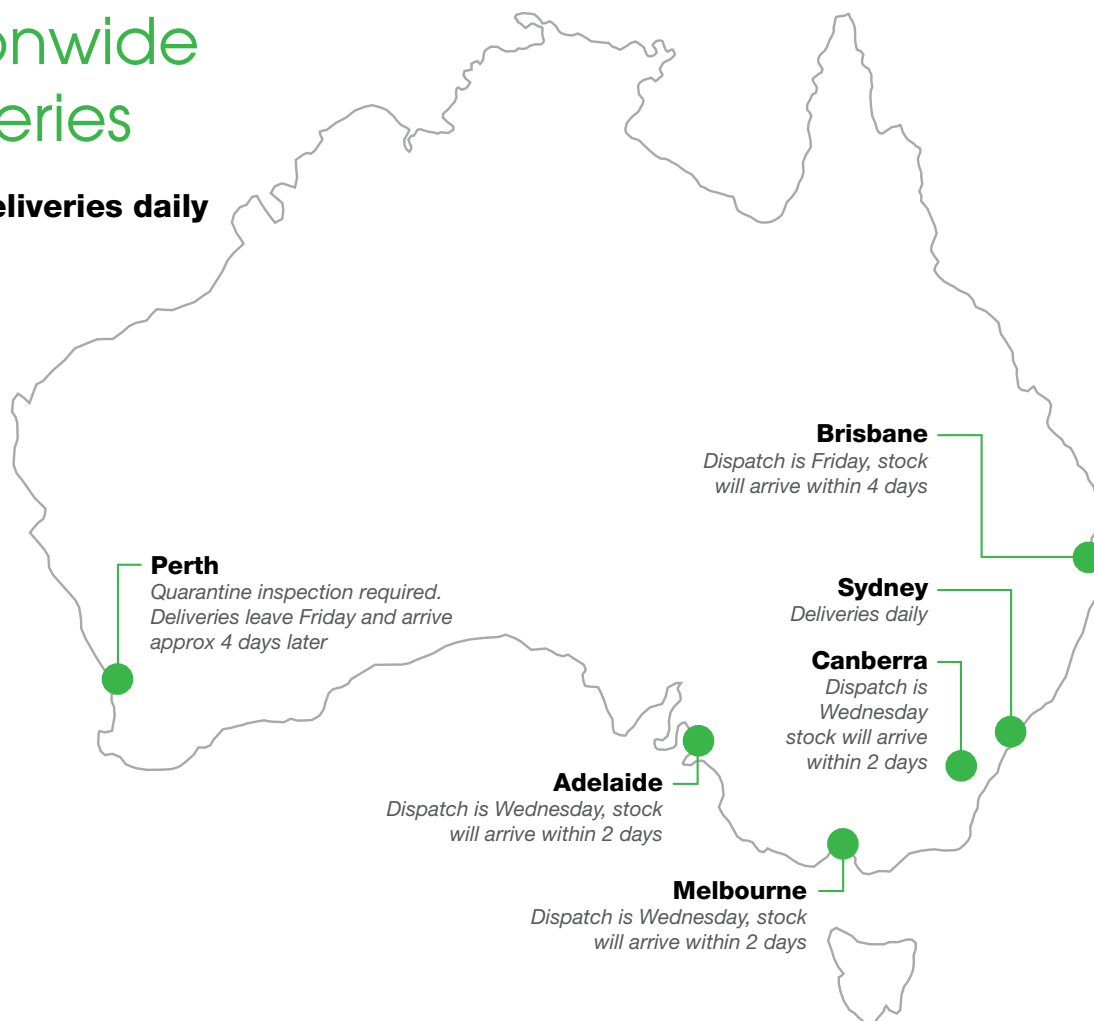

(image illustrates root development 2wks after bag removal and potting)

- Acceleration in plant growth
- Quicker development of feeder roots
- Stronger, quicker, healthier growing plants

Nationwide Deliveries

Sydney deliveries daily

Pick Up

Stylised and Designed Plants for your next project

Murraya paniculata

Orange Jasmine - Hedge

Our advanced hedging specimens of Murraya provide an instant screen. They are delivered pre-hedged giving you a dense and healthy plant. This is one of our many options for advanced screening.

Pyrus ussuriensis

Manchurian Pear - Pleached tree

This deciduous tree is grown with a straight trunk and is ideal for creating avenues or framing important landscape features. Please enquire about our range of deciduous pleached trees.

Murraya paniculata

Orange Jasmine - Topiary ball

Measuring 700mm in diameter, our topiary Murraya balls are great for a bold statement and filling out large planters.

We specialise in stylised plants designed for use in premium landscape projects.

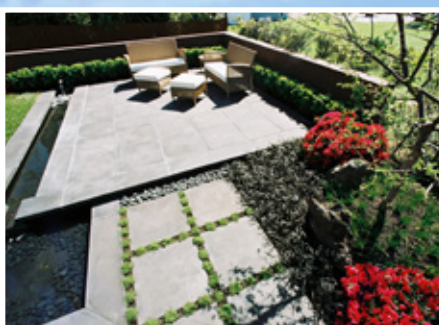

Our ground grown stock will give your project that established feel. Visit our property to select stock for your next project.

Michelia champaca

Himalayan Magnolia - Pleached tree

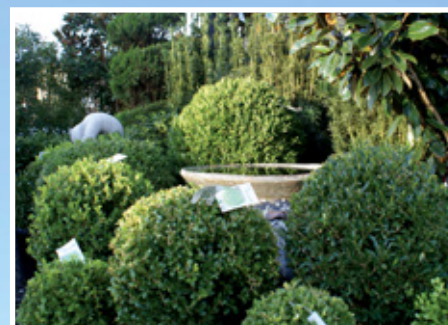

Our ground grown champaca's have been trained with a straight, clear trunk of 1100mm. This allows good levels of light to reach lawn and underplanting.

Azalea 'Red Wings'

For a vibrant splash of colour

For a vibrant splash of colour during the winter months Azalea 'Red Wings' are a great option with their unusually long flowering period. We grow a large range of specimens to add interest to your project.

Buxus spp

Box various varieties - Topiary ball

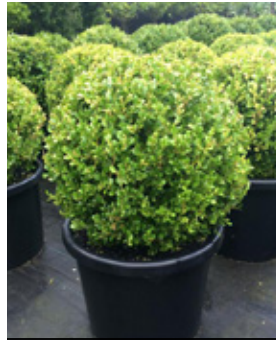

We produce Buxus topiary in 5 different species, in many different sizes and shapes: cones, balls, double balls, spirals and standards.
